Summary

Full-stack software engineer with experience building scalable backend systems and production infrastructure using **Node.js, TypeScript, React, and microservices**. Skilled in designing REST APIs, event-driven services, and automated **CI/CD pipelines**. Delivered measurable improvements including **40% API latency reduction**, **35% faster application response times**, and **70% infrastructure cost savings** through backend optimization and DevOps automation.

Technical Skills

Languages: JavaScript, TypeScript, Golang, Python, C++

Frontend: React.js, Next.js, Redux, TailwindCSS, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, REST APIs, Kafka, WebSockets, Microservices

Databases: PostgreSQL, MySQL, MongoDB

DevOps: Docker, Kubernetes, Jenkins, GitHub Actions, SonarQube, CI/CD, Linux, VPS Deployment, AWS

Architecture: Microservices, Event-Driven Systems, REST API Design

Testing: Jest, Unit Testing, API Testing

Professional Experience

Junior Software Developer

May 2024 – Present

Elansol Technologies Pvt Ltd

- Engineered scalable full-stack applications using **React, TypeScript, and Node.js** across multiple production systems.
- Optimized **Node.js and NestJS REST APIs** by improving database queries and request handling, reducing backend latency by **40%**.
- Enhanced API data flow and request management, resulting in **35% faster application response times**.
- Developed modular backend services using **NestJS** following layered architecture patterns to support scalable feature development.
- Integrated asynchronous communication using **Kafka** to enable event-driven workflows and improve system scalability.
- Automated CI / CD pipelines enforced using **Jenkins, Docker, and SonarQube** for streamlined deployments.
- Architected a self-hosted DevOps infrastructure using **Gitea, Jenkins, and SonarQube** deployed via Docker Compose.
- Reduced infrastructure costs by **70%** by migrating workloads from managed cloud services to optimized VPS deployments.

Projects

MERN Food Ordering Platform

Source Code — Live Demo

- Architected a full-stack food ordering platform using **React, TypeScript, Node.js, Express.js, and MongoDB**.
- Created RESTful APIs supporting authentication, product catalog management, and order workflows.
- Integrated **Stripe payment gateway** for secure online transactions.
- Applied authentication with **Auth0** and media storage using **Cloudinary**.
- Built responsive UI components using **TailwindCSS** supporting mobile and desktop devices.

Jobs API

Source Code — Live Demo

- Designed a secure REST API supporting CRUD operations for job management systems.
- Implemented **JWT authentication** and password encryption using **bcrypt**.
- Applied backend security best practices including **Helmet, rate limiting, and XSS protection**.
- Documented API endpoints using **Swagger UI** to improve developer usability.

Education

Bachelor of Engineering – Information Technology

2019 – 2023

Rashtrasant Tukdoji Maharaj University, Nagpur

Relevant Coursework: Data Structures, Database Systems, OOP, Cloud Computing, Software Testing
