Summary

Full-stack developer with experience building scalable web applications using React.js, Next.js, Node.js, and NestJS. Skilled in developing REST APIs, microservices, CI/CD pipelines, and cloud-based deployments using TypeScript, Docker, and modern DevOps practices. Experienced in optimizing backend performance, implementing secure authentication systems, and collaborating within Agile teams to deliver production-ready applications.

Technical Skills

Languages: JavaScript, TypeScript, Golang, Python, C++

Frontend: React.js, Next.js, Redux, TailwindCSS, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, REST APIs, GraphQL, Redis, Kafka, WebSockets, Microservices

Databases: PostgreSQL, MySQL, MongoDB

DevOps: Docker, Kubernetes, Jenkins, GitHub Actions, SonarQube, CI/CD, Linux, VPS Deployment, AWS, Basic GCP exposure

Architecture: Microservices, Event-Driven Systems, REST API Design

Testing: Jest, Unit Testing, Integration Testing, API Testing

Professional Experience

Junior Software Developer

May 2024 – March 2026

Elansol Technologies Pvt Ltd

- Engineered scalable full-stack applications using **React.js**, **TypeScript**, **Node.js**, and **NestJS** across multiple production systems, implementing secure authentication and authorization using **JWT-based API security practices**.
- Optimized REST APIs built with Node.js and NestJS by improving database queries and request handling, reducing backend latency by **40%**.
- Enhanced API data flow and request handling, resulting in **35% faster application response times**.
- Developed modular backend services using **NestJS** following layered architecture patterns to support scalable feature development.
- Integrated asynchronous communication using **Kafka** to enable event-driven workflows and improve system scalability.
- Automated **CI/CD pipelines** using **Jenkins**, **Docker**, and **SonarQube** to streamline testing and deployment workflows.
- Architected a self-hosted DevOps infrastructure using **Gitea**, **Jenkins**, and **SonarQube** deployed via Docker Compose.
- Reduced infrastructure costs by **70%** by migrating workloads from managed cloud services to optimized VPS deployments.
- Collaborated within **Agile development** teams participating in **sprint planning**, **code reviews**, and **feature estimations**.
- Investigated and resolved production-level backend issues through log analysis, **debugging**, and performance optimization.

Projects

MERN Food Ordering Platform

Source Code — Live Demo

- Architected a full-stack food ordering platform using **React**, **TypeScript**, **Node.js**, **Express.js**, and **MongoDB**.
- Integrated **Stripe payment gateway** for secure online transactions.
- Designed RESTful APIs supporting authentication, product catalog management, and order workflows.
- Built responsive UI components using **TailwindCSS** supporting mobile and desktop devices.

Jobs API

Source Code — Live Demo

- Designed a secure REST API supporting CRUD operations for job management systems.
- Implemented **JWT authentication** and password encryption using **bcrypt**.
- Applied backend security best practices including **Helmet**, **rate limiting**, and **XSS protection**.

Education

Bachelor of Engineering – Information Technology

2019 – 2023

Rashtrasant Tukdoji Maharaj University, Nagpur
